

IOI-Canada online course

OCEAN GOVERNANCE AFTER COP 28: PROBLEMS, PROGRESS & PROSPECTS

18th March - 23rd May 2024

OVERVIEW

This free, interdisciplinary course explores key aspects of ocean and coastal governance in the context of the challenges and opportunities facing the post-COP 28 world. Through a mix of webinar-style lectures, discussions, assignments, videos and readings, participants explore four modules on: Law of the Sea and Ocean Governance; Fisheries, Aquaculture and Food Security; State of the Ocean; and, Human Security and the Ocean.

FORMAT

With options for both live participation and self-paced study, this online training consists of 30 hours of presentations and Q&A, as well as preparatory materials for each lecture plus short assignments. The 20 live sessions take place twice a week from 18th March to 23rd May. Check out the [detailed schedule here](#). A certificate is available for those who complete all the course requirements.

APPLY NOW!

Full details and the link to the application form are available at www.dal.ca/ioihfx. Class size for live sessions will be capped to facilitate interaction and discussion, but the self-paced stream is anticipated to accommodate at least 100 participants. For more information, please contact ioi@dal.ca.

TARGET AUDIENCE

The training is aimed primarily at marine professionals around the world who have responsibility for some aspect of coastal and ocean management, and an eagerness to step outside their area of specialisation and into an international, interdisciplinary forum where diverse participants learn together, share different perspectives and examine issues from different viewpoints.

COURSE ORGANISER

The course is designed and delivered by [IOI-Canada](#), a leading member of the [International Ocean Institute network](#) of centres and focal points. Based at [Dalhousie University](#), it has over four decades of experience offering ocean governance training in Canada, with almost 740 alumni from over 100 countries, as well as scores more from recent online courses.

SPEAKERS

Participants will benefit from the knowledge and expertise of over 20 ocean specialists from a wide range of backgrounds and disciplines. These speakers include academics and practitioners with extensive experience in Canada and internationally. Check out the [course website](#) for the [speaker list](#).
